The Awning Collection

Discover an extensive portfolio of UK manufactured awnings and solutions for your residential and commercial requirements.

As a consumer, you know the importance of cost-effective investment to add value to your home or business. Whatever your requirements, our high quality products will provide the solution for your project, whether it be standard or bespoke.

We have over 200 awning fabrics, either to blend into your domestic décor, or on the contrary, to make a powerful brand statement.

With a variety of hardware colour options, your awning solution will be the right one for your project, creating a perfect match or the ideal contrast.

All our products meet UK health and safety standards and can be fully automated or manually controlled. Optional lighting and heating units can be integrated into the installation, providing comfort in the cooler months.

Our qualified trade sub-dealers have the skills to assist throughout the process of choosing the right shading solution for your home or your business.

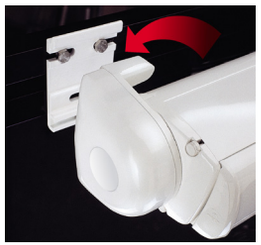
We don't just find the solution.
We create it.

A101: Bobcat

High quality and style, manufactured in the UK.

THE INSTALL

A very strong yet very simple end-fix design means fitting the A101: Bobcat is easy whilst providing a strong, sturdy bracket detail.



THE DESIGN

The A101: Bobcat system and design has been in the market for many years and has been fine tuned to give maximum quality and strength, balanced with its very competitive costs.

With its design and technology, the A101: Bobcat offers the perfect balance between efficiency, strength and lightness. The elegant design features aerodynamic lines that conceal the mechanical installation elements, helping it blend into the most distinguished applications. The design gives an impeccable appearance of great aesthetic value and high quality.

The A101: Bobcat is easy to install, and requires little maintenance whilst retaining a long life span for residential applications.

- Standard RAL colour: White (RAL 9010)

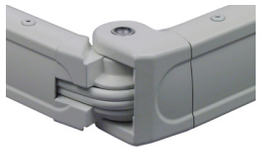
A101: Puma

Award winning design and style, manufactured in the UK.

THE ARM
The slender arm with a PUR sheathed 2 cable band guarantees more than 25,000 movements.



THE TECHNOLOGY
Cast aluminium parts and advanced mechanism guarantee a simple inclination adjustment.

THE COVER
The cover closes against the cassette front profile

The compact A101: Puma cassette effectively protects both the fabric and mechanism, providing a long awning life. Elegantly shaped end caps maintain a smooth design. High performance components and precision craftsmanship guarantee perfect functioning and longevity. The streamlined, high strength extruded brackets ensure simple and fast installation, even on difficult façades.

All of this with a standard 5 year guarantee on parts, it's a perfect combination of quality and affordability.

- Standard RAL colour: White (RAL 9010)
- Corrosion resistant, powder coated, extruded aluminium hardware, with stainless steel components
- Fully adjustable pitch settings from 15° to 75°
- 2 x 4mm tear resistant steel cables, guaranteeing at least 25,000 movements

A101: Jaguar

High quality and style, manufactured in the UK.

THE ARM

At least 75,000 arm operations are guaranteed thanks to tear resistant steel cables.

THE INSTALL

Strength and sturdiness provide a simple install of the A101: Jaguar, using a square bar fixing with multiple brackets.

The A101: Jaguar system is the strongest non-cassette patio awning manufactured in the UK. The 4000mm projection can withstand strong winds, whilst sustaining the sturdy and elegant properties required from an awning.

Top quality fabrics and technical systems come together in the A101: Jaguar. Expert manufacturing will guarantee reliable functionality and durability.

- Standard RAL colour: White (RAL 9010)
- Corrosion resistant, powder coated, extruded aluminium hardware, with stainless steel components
- Fully adjustable pitch settings from 15° to 45°
- 4 x 4mm tear resistant steel cables, guaranteeing at least 75,000 arm operations
- Multi-installation points, with crossover arm option, allowing a projection larger than the awning width
- TUV quality marked, CE safety marked, complying with CEN standards
- Face-fix or top-fix installation options
- Mechanical gearbox or RTS Somfy Motor operation options
- Wind Class 3
- Quantity of brackets; between 2 to 6 dependent on size

Technical Specifications

MAXIMUM WIDTH (mm)	18000
MAXIMUM PROJECTION (mm)	4000*

PROJECTION (mm)	1500	2000	2500	3000	3500	4000
MINIMUM WIDTH (mm)	1980	2480	2980	3480	3980	4480

**4000mm as standard, 4500mm projection available on request, reduces wind class from 3 to 2*

For technical specifications, please refer to page 12.

A101: Panther

High quality and style, manufactured in the UK.

THE INSTALL

Strength and sturdiness provide a simple install of the A101: Panther using a square bar fixing with multiple brackets.

THE ARM

With 4x4mm tear resistant steel cables, at least 75,000 arm operations are guaranteed.

The A101: Panther system is the strongest patio awning manufactured in the UK. Even at a 4000mm projection it can withstand strong winds, whilst showcasing an elegant yet compact, sturdy awning. Multi-installation points with cross-over arm options allow for solutions in many applications. Only the finest technical systems and fabrics are used within the design. Top quality materials and precision craftsmanship go hand in hand to guarantee perfect functionality and durability.

- Standard RAL colour: White (RAL 9010)
- Corrosion resistant, powder coated, extruded aluminium hardware, with stainless steel components
- Fully adjustable pitch settings from 15° to 45°
- 4 x 4mm tear resistant steel cables, guaranteeing at least 75,000 arm operations

A105: Ocelot

Versatile shading all year round.

PROTECTED
Fully protected by the means of its cassette, the A105: Ocelot is fully encased when retracted to keep it safe through all kinds of weather.

ULTIMATE SHADE
The design of this product means that it can catch of block sun as much as you like, up to 155° to suit your requirements

The A105: Ocelot Drop-Arm awning is neat and versatile. A very cost effective method of shading and screening; a sturdy, but lightweight, system. Operating from a fixed pivot point, the A105: Ocelot's arm drop is the same as its projection.

These Drop-Arm awnings can be stopped exactly in the position required. If low lying sun is a problem, they can be extended to 155° enabling to shade to cover most of the window if necessary.

- Choice of any RAL colour
- Corrosion resistant, powder coated, extruded aluminium hardware, with stainless steel components
- Slim, flush cassette ensuring that the fabric and components are protected from weather when retracted
- Fully adjustable pitch settings from 0° to 60° for ultimate sun protection, 365 days a year
- TUV quality marked, CE safety marked, complying with CEN standards
- Wind class 2
- Mechanical gearbox or RTS Somfy Motor operation options

Technical Specifications

MAXIMUM WIDTH (mm)	4800
MAXIMUM PROJECTION (mm)	1600
